Experiences

AMEDEUS IT GROUP
Melbourne, VIC, AU
Dec 2019 – Present

Frontend Engineer

- Amadeus is a multinational technology company that provides software solutions for the global travel and tourism industry.
- We develop a self-service application that offers real-time monitoring and management capabilities. It is a Web Application written using React and TypeScript for the front end and .net for backend services. Its primary data source is the Real Time Hub, a technology-agnostic ReSTFul API.
- Provided mentorship to junior software engineers, fostering their growth in front-end development techniques, best practices, and tools
- **Technologies used**: Material-UI, Tailwind, CSS, Bootstrap 4, JavaScript, JQuery, RESTful APIs, TypeScript, React & Redux, Three.js, Playwright, C#, Agile, Git, PostMan, Agile
- **Achievement**:
  - Released airline booking applications Tiger Air airline, and NokScoot airline.
  - Implemented an Agency system for airlines tracking faulty products, making the team 100% grow larger.
  - Chosen as the only Front End developer to remain employed during the pandemic.
